

FaxCop
SANYX International Ltd.
Willowtree House
Newtownards
Co. Down
BT23 8FJ

28th September 2007

To Whom It May Concern:

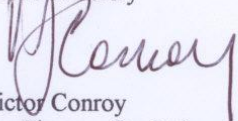

Before using the FaxCop, we had been receiving on average five to six junk faxes per day on our fax machine.

The FaxCop was fitted on 3rd August 2007 and over the past couple months we have noticed a dramatic reduction in the junk faxes, they have reduced down to eight per month while, over the same period, receiving all our legitimate faxes as normal (approx three /day).

We have also noticed that the FaxCop has also considerably reduced our use of toner by around 70% and eliminated much of our waste fax paper.

Overall, we have found that the trial with the FaxCop has been considered very successful and has made a considerable impact on the way we use our fax machine.

Yours sincerely

Victor Conroy
