6.1.09

To whom it may concern:

We have been operating a SANYX international device for the reduction of unwanted fax communications for approximately 3 months. Since using the device we have seen a dramatic reduction in the number of unwanted faxes we receive. I would estimate that the device has reduced the volume of spam faxes we received by approximately 95% over this period. We have also found that installing the device has not affected legitimate faxes from getting through.

The device has resulted in a significant saving in paper, ink cartridges and the time spent sorting through and disposing of unwanted communications. We have received no incentive to run this test and are not associated with SANYX international.

Yours Sincerely,

A handwritten signature in blue ink, appearing to read 'Ann Blair'.
